Ultimate explanation ABOUT LIFE

Rules to study this book

1) Don't jump direct in the end
2) Either read full or just don't read half knowledge is always dangerous
3) Read with focus, No other work!
4) Pls ignore my grammar

I have studied so many philosophy and other books(+990) about Life and I have reached the End, now I get to know all the answers of questions like why life ? What is the purpose? Why are we here? Why do we exist? Does God exist? Etc.

Don't think about life's purpose itself instead think about If life has a meaning or purpose, what could it be? Peace? Satisfaction? Happiness? Good deeds or welfare? .If there is purpose of life then we wouldn't have free will For example:-

Suppose our life has purpose of mining only in gold mine Will human beings with that Brain do what we supposed to do? Of course not. So don't you think the answer should be where it makes sense(wait a little you will get answer). What about heaven and hells ? I would say to watch calhoun effect. It was a experiment by calhoun and it shows hell heaven after like is nothing more than a joke as in that experiment some rats were put in cage(cage capacity was more than 3000 rats) and he set everything like heaven unlimited food water and comfort things etc all things that can be possible. What do you think what would have happened?. The answer is all Rats died in 3-4 year even they couldn't touch the capacity. I won't explain much as this effect already on internet. So our question remains same but not your mindset anymore

Do you think God exists? Well it doesn't matter really because we know God is not the ultimate creator. As so many experts of science will agree with me, if this world is created there is only one possibility which is This World create itself. Now you wonder how?

Well, i don't know either because humans haven't achieved this much technology in 2026 so if you find out how this world was created? you will find meaning of life?, Absolutely NO because if an orphan finds out his or her parents will it gives purpose of life ?NO, Listen there is no purpose of life because if there is. Then this world becomes real nonsense, example

(Follow rule no.2)

Suppose AI has a purpose to serve us but somehow we disappear so if AI finds out who created them or even they meet with a human will they find purpose or meaning of life? Even though we created them , we are the god for them. If there is purpose then would there be any sense of living?

- Ancient People were the one who created God as they know they can't know about life fully so that answer was famous so that we just ignore real thing But Now I am going to talk about sensitive part, Most people won't agree but when Past time scientist in 6bce said earth is not flat people also didn't agree with them and heavily

> criticise them because they didn't have proof Until human able to go out of earth. Whatever I have said in this book you might think is false without evidence But understand the problem Itself is imaginary so how can the answer should have physical or evidence? (*People in the future would must have understand when technology finally reached my level)*

All Religion have ever made, are incomplete because how a person should live depends on person complete but where religion becomes problem when they said this is best way to live life or toy think it is best way of live a life But as I told you earlier happiness, anger, sadness, excitement etc all these emotions help to keep us alive Life is a kind of spectacle how you see it that became your life meaning or purpose of life For example

I am wearing black glasses. The world looks like black to me but is the world really black? Means *If you go to an energetic person* you will feel there is one life we have to do all things could be done etc. but if you go to demotivated person or nihilist person you will feel life is meaning less nothing matter in the world so why to do anything and on the other hand if you go to emotional and religious person you will feel they help people for self satisfaction or heaven story😅 so what do you think which has good thinking person A,B,C,

The answer is D none of these or all of these as I told you there is no perfect way to live life So many youngsters like You must have thought Money can buy happiness? Well if this question is asked to me before 4 years i would answer yes but after reading and seeing so many lifes
I CAN clearly say No, trust me if I made you Alone musk you will be bored after 6 months ? 1 year ? 2 years? Maximum 4 years ? That is it so money and power useless?

Not really beautiful having both avoids you to do unwanted work As I told you earlier you should do whatever you want in your life and just avoid unwanted work to avoid it You need power and money. So i really have u answer, Nope you might know it already but what I give You in this book is mindset or perspective

Well this is the end but I also have my philosophy of life. If u want the next part show me You really want I will upload (some of you must not have money so how can u help me? Follow me on YouTube, Search exactly same:- @Author_from_future)
